A Fractured Mind: My Life with Multiple Personality ...

My Amazon review: Books on multiple personality disorder are not, as a rule, very well written and A Fractured Mind is no exception to this. It is unfortunate, however, that where those other books made up for literary lapses by being incredibly emotional, open, and intriguing, A Fractured Mind falls more than short.

A Fractured Mind: My Life with Multiple Personality ...

There are many similarities with my normal mind and the multiple personalities portrayed by the fractured mind in this book. This book caused much rethinking of myself, who I am, which changes depending on circumstances. French writer Montagne is supposed to have said a person is wavelike and varying rather than having a constant personality.

In 1989, Robert B. Oxnam, the successful China scholar and president of the Asia Society, faced up to what he thought was his biggest personal challenge: alcoholism. But this dependency masked a problem far more serious: Multiple Personality Disorder. At the peak of his professional career, after having led the Asia Society for nearly a decade, Oxnam was haunted by periodic blackouts and episodic rages. After his family and friends intervened, Oxnam received help from a psychiatrist, Dr. Jeffrey Smith, and entered a rehab center. It wasn't until 1990 during a session with Dr. Smith that the first of Oxnam's eleven alternate personalities--an angry young boy named Tommy--suddenly emerged. With Dr. Smith's help, Oxnam began the exhausting and fascinating process of uncovering his many personalities and the childhood trauma that caused his condition. This is the powerful and moving story of one person's struggle with this terrifying illness. The book includes an epilogue by Dr. Smith in which he describes Robert's case, the treatment, and the nature of multiple personality disorder. Robert's courage in facing his situation and overcoming his painful past makes for a dramatic and inspiring book.

We all have many sides to our personalities, which we display to different friends, colleagues and partners, but what happens if those facets become detached from each other, and take on lives of their own? This is what Bob Oxnam was to discover when he was diagnosed with multiple personality disorder. The first of Bob's personalities to make himself known during therapy was an angry young boy named Tommy, who claimed to live in a castle in Bob's mind. Bob's psychiatrist eventually met all 12 'people' who lived in the castle. He uncovered why Tommy was torturing Bobby in the dungeon, and the many other layers of terror that had lived in Bob since he was a small child. Told in the voices of the different personas, we see the bookish Robert take over as dominant personality from Bob, and watch as the other personalities successfully merge into the three that share power today.

Fractured Minds introduces the reader to clinical neuropsychology through vivid case descriptions of adults who have suffered brain damage. At one level, this is a book about the courage, humor, and determination to triumph over illness and disability that many "ordinary people" demonstrate when coping with the extraordinary stress of a brain disorder. On another level, it is a well-referenced and up-to-date textbook that provides a holistic view of the practice of clinical neuropsychology. Included are reader-friendly descriptions and explanations of a wide range of neurological disorders and neuroscientific concepts. Two introductory chapters are followed by 17 chapters that each focus on a specific disorder and include research, clinical assessment, rehabilitation, and a detailed case study. Disorders range across the full spectrum from common ones such as traumatic brain injury and dementia, to rare disorders such as autotopagnosia. Each of the 16 chapters retained from the first edition has been revised to reflect current research and clinical advances. Three new chapters on multiple sclerosis, Parkinson's disease, and Huntington's disease incorporate discussion of important current topics such as genetically-transmitted diseases, genetic counseling, gene transplantation, functional neurosurgery, and the complex ethical issues that go hand-in-hand with these new techniques. This informative and engaging book will be of interest to students of clinical psychology, neuropsychology, and neurology, health professionals who work with neurological patients, neurological patients and their families, and lay readers who are simply fascinated by the mind and brain.

Presents the life of the Heisman trophy winner, discussing his impoverished childhood, his development as a teenage

athlete, his college and NFL professional career, his success as a businessman, and his diagnosis and treatment for dissociative identity disorder.

A psychiatrist describes his work with Karen Overhill, a patient complaining of acute depression who turned out to have been a victim of horrific childhood sexual abuse and who to survive had developed seventeen distinct and separate personalities, and his challenging efforts to reunite the separate selves into a whole person. Reprint. 50,000 first printing.

#1 NEW YORK TIMES, WALL STREET JOURNAL, AND BOSTON GLOBE BESTSELLER • One of the most acclaimed books of our time: an unforgettable memoir about a young woman who, kept out of school, leaves her survivalist family and goes on to earn a PhD from Cambridge University “Extraordinary . . . an act of courage and self-invention.”—The New York Times NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY THE NEW YORK TIMES BOOK REVIEW • ONE OF PRESIDENT BARACK OBAMA’S FAVORITE BOOKS OF THE YEAR • BILL GATES’S HOLIDAY READING LIST • FINALIST: National Book Critics Circle’s Award In Autobiography and John Leonard Prize For Best First Book • PEN/Jean Stein Book Award • Los Angeles Times Book Prize Born to survivalists in the mountains of Idaho, Tara Westover was seventeen the first time she set foot in a classroom. Her family was so isolated from mainstream society that there was no one to ensure the children received an education, and no one to intervene when one of Tara’s older brothers became violent. When another brother got himself into college, Tara decided to try a new kind of life. Her quest for knowledge transformed her, taking her over oceans and across continents, to Harvard and to Cambridge University. Only then would she wonder if she’d traveled too far, if there was still a way home. “Beautiful and propulsive . . . Despite the singularity of [Westover’s] childhood, the questions her book poses are universal: How much of ourselves should we give to those we love? And how much must we betray them to grow up?”—Vogue NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post • O: The Oprah Magazine • Time • NPR • Good Morning America • San Francisco Chronicle • The Guardian • The Economist • Financial Times • Newsday • New York Post • theSkimm • Refinery29 • Bloomberg • Self • Real Simple • Town & Country • Bustle • Paste • Publishers Weekly • Library Journal • LibraryReads • Book Riot • Pamela Paul, KQED • New York Public Library

In "Multiple Personality Disorder from the Inside Out," 146 people who have MPD and their significant others reveal the complex issues of diagnosis, therapy, and maintaining personal relationships. These writings have been gathered into a compelling and practical volume for anyone interested in improving the support network for individuals who suffer with MPD.

Kim Noble is an accomplished artist whose work has been exhibited around the world. She is a mother with a teenage daughter. She is a bubbly and vivacious woman. To meet her you wouldn't think anything was wrong. But when Kim was younger than five years old, her personality splintered and fractured. In 1995 she was finally diagnosed with Dissociative Identity Disorder (DID) which has been described as a creative way to cope with unbearable pain. Now her body plays host to more than 20 different personalities, or 'alters'. There are women and men, adults and children; there is a scared little boy who speaks only Latin, an elective mute, a gay man and an anorexic teenager. Some alters age with her body; others are stuck in time. ALL OF ME takes the reader through the extraordinary world of a woman for whom the very nature of reality is different. It will tell of her terrifying battles to understand her own mind; of her desperate struggle against all odds to win back the child she loved; and of her courage and commitment in trying to make sense of her life. It is by turns shocking, inspiring, sometimes funny, and deeply moving.

I'm not crazy. I'm the product of a schizophrenic mother who seemed more evil than human, and a bipolar father who didn't love me enough to stay. But I'm not crazy. Now I'm struggling with life and question myself and my decisions every single day. Are these signs? Red flags? I won't let myself look too close. I refuse to be crazy. Then four men swoop in just when I need them. They're protective, supportive, and everything I never had even though we're unconventional. I want to be the person they need me to be. I need it. But I'm afraid...that I'm crazy.

Grief put her down. Can love pick her up? Newlyweds Renny and Adam Carter have been married for six wonderful months. One evening their peaceful ride down a misty two-lane road in Whisper, North Carolina is tragically interrupted. They're hit by a truck carrying tree logs. Renny's husband is instantly killed. She escapes with a broken life, a broken heart, and a fractured mind. Merek Spencer's mother was kidnapped fifteen years ago. The event shocked the small and idyllic town of Whisper. But soon the spectacular crime lost its luster, and things returned to normal for everyone except Merek and his father, James, who blames himself for the crime. For this reason, Merek has had to play role reversal with his father. And despite Merek's model good looks, he is a loner by choice, working late hours as an architect. At age 36, he has had plenty of opportunities to open himself up to love, but for some reason he cannot. All of that changes when he meets Renny Carter on the worst night of her life. He pulls her out of a wrecked car and his long dormant feelings awaken from their deep sleep. Reluctantly and ashamedly, Renny also feels the connection. Merek and Renny part ways never expecting to see one another again. Fate has another plan. How soon should love arise after a devastating loss? Can such a love be legitimate? What about the guilt? Can such a love be of God?
