divide by 3 is in the way of

Access Free Algebra 2 Multiplying And Dividing

Radicals Answer

that! If we multiply by 3 we can cancel out the divide by 3 (because $3/3=1$) So, let us try multiplying by 3 on both sides: $x \cdot 3 \cdot 3 = 5 \cdot 3$. A little arithmetic ($1 \cdot 3 \cdot 3 = 1$ and $5 \cdot 3 = 15$) becomes: $1x = 15$. Which is just: $x = 15$.

Algebra 2B-Unit 2 Lesson 1

Access Free Algebra 2 Multiplying And Dividing Radicals Answer

We are dividing a polynomial of degree 2 by a polynomial of degree 1. This is algebraic long division.

Step 1: We look at the first term of $(3x^2 - 11x - 4)$ and the first term of $(x - 4)$.

Access Free Algebra 2 Multiplying And Dividing

Divide as follows: $3x^2 \div x$
 $= 3x$. We write $3x$ at top of
our long division and
multiply $(3x)(x - 4) = 3x^2$
 $- 12x$ to give the second row
of our solution.
