The chief structures of the mouth are the teeth, which tear and grind ingested food into small pieces that are suitable for digestion; the tongue, which positions and mixes food and also carries sensory receptors for taste; and the palate, which separates the mouth from the nasal cavity, allowing separate passages for air and for food. All these structures, along with the lips, are involved in the formation of speech sounds by modifying the passage of air through the mouth.

The recital of The Book of Opening the Mouth and the Liturgy of Funerary Offerings were in use among the Predynastic Egyptians of the later part of the Neolithic Period, before the art of writing had evolved, and continued to exercise a considerable influence on Egyptian religious literature until the time of Roman Empire. A versatile missive written from the intersections of gender, disability, trauma, and survival. "Some girls are not made," torrin a. greathouse writes, "but spring from the dirt." Guided by a devastatingly precise hand, *Wound from the Mouth of a Wound*—selected by Aimee Nezhukumatathil as the winner of the 2020 Ballard Spahr Prize for Poetry—challenges a canon that decides what shades of beauty deserve to live in a poem. greathouse celebrates "buckteeth & ulcer." She odes the pulp of a bedsore. She argues that the vestigial is not devoid of meaning, and in kinetic and vigorous language, she honors bodies the world too often wants dead. These poems ache, but they do not surrender. They bleed, but they spit the blood in our eyes. Their imagery pulses on the page, fractal and fluid, blooming in a medley of forms: broken essays, haibun born of erasure, a sonnet meant to be read in the mirror. greathouse's poetry demands more of language and those who wield it. "I'm still learning not to let a stranger speak / me into a funeral." Concrete and evocative, *Wound from the Mouth of a Wound* is a testament to persistence, even when the body is not allowed to thrive. greathouse—elegant, vicious, "a one-girl armageddon" draped in crushed velvet—teaches us that fragility is not synonymous with flaw.

Somewhat overlooked upon its initial release in 1995, John Carpenter's In the Mouth of Madness has since developed a healthy cult reputation. But far more than simply a fan favorite, this closing installment of the acclaimed director's self-described "apocalypse trilogy" (following The Thing and Prince Of Darkness) stands today as one of his most thematically complex and stylistically audacious pieces of work. The story of an insurance investigator drawn into the supposedly fictional universe of a best-

selling horror novelist, the film is an extension of many recurring themes found in Carpenter's filmography (the end of the world, the loss of free will, a distrust of mass industry and global corporations, the cataclysmic resurgence of ancient evil), as well as an affectionate homage to the works of H. P. Lovecraft (and horror literature more broadly) and a self-reflexive celebration of the horror genre that predates the *Scream*-inspired postmodernist boom of late-'90s genre cinema. While numerous books and countless academic essays have been written about Carpenter's work, surprisingly little has focused exclusively on *In the Mouth of Madness*, a film which feels more prescient, more essential, and more daringly complex than ever. This book seeks to redress this imbalance, at last positioning this overlooked masterpiece as essential Carpenter.
