Safebridge, the online-based simulation training specialist, has now added the MARIS ECDIS900 to its extensive portfolio of online Electronic Chart Display and Information System (ECDIS) training courses. MARIS, a world leader in ECDIS technology, has appointed Safebridge and its sister company MSG MarineServe GmbH as approved providers of type-specific ECDIS training courses. Safebridge and ...

Maritime navigation has rapidly developed since the publication of the last edition of the title with methods of global position fixing for shipping becoming standardized. As in the previous two editions, this edition will provide a sound basis for the understanding of modern navigation systems and brings the student or professional

up-to-date with the latest developments in technology and the growing standardization of maritime navigation techniques. Developed with close scrutiny from the US Merchant Marine Academy and the major maritime navigation centres in the UK, outdated techniques have been replaced by an expanded section on the now standard Navstar GPS systems and the Integrated Nav. In addition, a new chapter on the application of electronic charts will also be included, as well as problems at the end of each chapter with worked solutions.

GPS For Mariners is a comprehensive guide for recreational boaters to learn how to operate and effectively use today's GPS systems in everyday navigational situations. While all GPS products come with operational manuals and there are books on how to use your GPS for land or aerial navigation, there is very little information available to recreational boaters on how to best utilize their GPS for marine navigation. From learning the history of GPS, discovering the functions of the GPS, understanding basic and advance course-plotting, learning advance navigation with GPS, interfacing a GPS with an autopilot, to using a GPS with electronic charts on a PC, GPS For Mariners includes everything the novice to the more experienced boater should know about their GPS system. GPS For Mariners is the ultimate how-to guide and ready reference leading to GPS proficiency.

This is a reprint of the 1979 edition of Parallel Indexing Techniques, first published by Stanford Maritime.

Electronic navigation, although still relatively new, is becoming increasingly more common, particularly on commercial vessels. This handbook offers a wealth of detailed information about how different charting systems operate and answers the most commonly asked questions regarding electronic charts (ENC, RNC, DNC) and electronic chart systems (ECD)
