The academy is in crisis. Students call for speakers to be banned, books to be slapped with trigger warnings and university to be a Safe Space, free of offensive words or upsetting ideas. But as tempting as it is to write off intolerant students as a generational blip, or a science experiment gone wrong, they've been getting their ideas from somewhere. Bringing together leading journalists, academics and agitators from the US and UK, Unsafe Space is a wake-up call. From the war on lad culture to the clampdown on climate sceptics, we need to resist all attempts to curtail free speech on campus. But society also needs to take a long, hard look at itself. Our inability to stick up for our founding, liberal values, to insist that the free exchange of ideas should always be a risky business, has eroded free speech from within.

Through engagement with human behaviour from the level of the private individual to the international community, in Amnesty and Revolution: An Amateur's View of Life As It Stands a holistic type of reform is advocated; solutions to scarcity and inequity are formulated with due regard to the cost of revoking commitments already in motion. The author's rationale is to provide a counterbalance wherever excess or paucity is perceived, and by applying a moderate degree of erudition and scientific understanding to the exercise of drawing inferences and forging creative associations, the book's themes are addressed intellectually and intuitively. In Amnesty and Revolution the author specifically addresses domestic economic and social policy, social work, mental health, health problems associated with modern technology, renewable and non-renewable energy, environmental policy, globalisation, international conflicts and internal security. The author consistently targets systems rather than specific actors, in order to appease those who despite their culpability possess skills and experience which may be useful in effecting peaceable reform. In several places within the text there are extensive descriptions which serve as expedient points of access to the text's central arguments. Since these descriptions serve as introductions to topics which are related to academic specialisms, although hitherto they may not have been recognised as such, this book would be of great value to academics. Indeed, industrial specialisation and the manner in which this can prevent the context of a specialism being understood by its practitioners is a theme which is explored within the text. While some explanations would be understood more easily with foreknowledge of certain scientific principles, the central arguments of the text are accessible without scientific explanations needing to be fully understood. Accordingly the book is suitable for a general audience, and especially anyone with an interest in progressive politics, addressing as it does a range of contentious issues.

Is nursing in England experiencing a fundamental moral crisis? A number of recent high-profile reports about the state of nursing care in English hospitals certainly add weight to this argument; however, although the intense media attention on the decline of compassion in nursing has highlighted some of the issues, it has neither explained the underlying causes nor signalled a realistic solution. In this timely and important book, a collection of expert authors with a wealth of academic and practice experience examine the multitude of areas that need to be understood, and issues that must be addressed, before the policy recommendations triggered by the latest furore can be realised. These include: • Policy perspectives on compassion • Analysis of the historical roots of the concept of compassion • Examination of compassion in a contemporary nursing context, including patients' perspectives • The organisation of services to deliver compassion • Approaches to supporting staff to provide compassionate care. Compassion in nursing has become an issue of national attention in England; however, there has been a tendency for sensationalised reports to win out over analysis. This book explores the issues involved in more detail and depth. It is an essential resource for nursing students, practising nurses and health service managers, and anyone else interested in creating a compassionate health service.

The long cultural moment that arose in the wake of 9/11 and the conflict in the Middle East has fostered a global wave of surveillance and counterinsurgency. Performance in a Militarized Culture explores the ways in which we experience this new status quo. Addressing the most commonplace of everyday interactions, from mobile phone calls to traffic cameras, this edited collection considers: How militarization appropriates and deploys performance techniques How performing arts practices can confront militarization The long and complex history of militarization How the war on terror has transformed into a values system that prioritizes the military The ways in which performance can be used to secure and maintain power across social strata Performance in a Militarized Culture draws on performances from North, Central, and South America; Europe; the Middle East; and Asia to chronicle a range of experience: from those who live under a daily threat of terrorism, to others who live with a distant, imagined fear of such danger.

Offering a uniquely 'psycho-cultural' take on the emotional dynamics of UK political culture this book uses theories and research in psychoanalysis, cultural and media studies and political sociology. It explores the cultural and emotional processes that shape our relationship to politics in a media age, referencing Joanna Lumley to Nigel Farage.

From the future of work to the nature of our closest relationships, how do we understand the links between our personal troubles and wider public issues in society today? Now into its fourth edition, Public Sociology continues to highlight the relevance of a grounded sociological perspective to Australian social life, as well as encouraging students to apply a sociological gaze to their own lives and the communities in which they live. Public Sociology presents a wide range of topics in a user-friendly and accessible way, introducing key theories and research methods, and exploring core themes, including youth, families and intimate relationships, class and inequality and race and ethnic relations. All chapters have been extensively revised to bring them up to date in a fast-changing social world, reflecting the latest sociological debates in response to changing lifestyles and evolving political landscapes. In addition to updated statistics and research findings, an expanded glossary and the latest citations to the scholarly literature, the text features a completely new chapter on gender and sexualities with expanded discussion of LGBTQI+.. This new edition also explores contemporary issues ranging from the #MeToo movement to marriage equality, fake news and 'alt facts'. This is the essential sociological reference to help students make sense of a complex and challenging world. NEW TO THE FOURTH EDITION: * A new chapter on gender and sexualities and expanded discussion of intersectionality * Exploration of the latest social issues including #MeToo, rising inequality, and the 'post-truth' age * All chapters thoroughly revised and updated with the latest research * Updated book website with extra readings, YouTube clips, and case studies * A new feature, Visual Sociology, helps the reader analyse the power of visual messaging 'With a firm base in the richest traditions of the discipline and with a remarkably approachable format, this book offers an excellent introduction to a wide array of sociology's concerns, making it suitable for all Australian social science undergraduates.' Gary Wickham, Emeritus Professor of Sociology, Murdoch University 'A sophisticated yet accessible introduction to social identities, differences and inequalities, and social transformations.' Jo Lindsay, Professor in Sociology, Monash University 'Sweeping and lucid...communicates with ease and simplicity.' Toni Makkai, Emeritus Professor, College of Arts and Social Sciences, Australian National University

From bank bailouts to austerity, Europe's and Ireland's response to the economic crisis has been engineered specifically to shift the burden of paying for the crisis onto ordinary citizens while investors, financiers, bankers and the privileged are protected. The authors expose the class-based nature of Ireland's crisis resolution.

The seamy underside of humanitarianism What does it mean when humanitarianism is the response to death, injury and suffering at the border? This book interrogates the politics of humanitarian responses to border violence and unequal mobility, arguing that such responses mask underlying injustices, depoliticise violent borders and bolster liberal and paternalist approaches to suffering. Focusing on the diversity of actors involved in humanitarian assistance alongside the times and spaces of action, the book draws a direct line between privileges of movement and global inequalities of race, class, gender and disability rooted in colonial histories and white supremacy and humanitarian efforts that save lives while entrenching such inequalities. Based on eight years of research with border police, European Union officials, professional humanitarians, and grassroots activists in Europe's borderlands, including Italy and Greece, the book argues that this kind of saving lives builds, expands and deepens already restrictive borders and exclusive and exceptional identities through what the book calls humanitarian borderwork.

In this multidisciplinary book, experts from around the globe examine how data-driven political campaigning works, what challenges it poses for personal privacy and democracy, and how emerging practices should be regulated. The rise of big data analytics in the political process has triggered official investigations in many countries around the world, and become the subject of broad and intense debate. Political parties increasingly rely on data analytics to profile the electorate and to target specific voter groups with individualised messages based on their demographic attributes. Political micro-targeting has become a major factor in modern campaigning, because of its potential to influence opinions, to mobilise supporters and to get out votes. The book explores the legal, philosophical and political dimensions of big data analytics in the electoral process. It demonstrates that the unregulated use of big personal data for political purposes not only infringes voters' privacy rights, but also has the potential to jeopardise the future of the democratic process, and proposes reforms to address the key regulatory and ethical questions arising from the mining, use and storage of massive amounts of voter data. Providing an interdisciplinary assessment of the use and regulation of big data in the political process, this book will appeal to scholars from law, political science, political philosophy and media studies, policy makers and anyone who cares about democracy in the age of data-driven political campaigning.

Bob Crow was the most high-profile and militant union leader of his generation. This biography focuses on his leadership of the RMT union, examining and exposing a number of popular myths created about him by political opponents. Using the schema of his personal characteristics (including his public persona), his politics and the power of his members, it explains how and why he was able to punch above his weight in industrial relations and on the political stage, helping the small RMT union become as influential as many of its much larger counterparts. As RMT leader, Crow oversaw a rise in membership and promoted a more assertive and successful bargaining approach. While he failed to unite all socialists into one new party, he established himself as the leading popular critic of neo-liberalism, 'New' Labour and the age of austerity.
