35 was a product of the merger of Massey-Harris and Ferguson. It incorporated numerous improvements and new features and became massively popular worldwide. Its companion, the 65 model, was introduced shortly afterwards and was a larger tractor, offered with the revolutionary Multi Power system that gave 12 forward and four reverse gears. Durable and versatile, these tractors are still a practical proposition today, and even unrestored examples command high prices. Michael Thorne, author of Ferguson TE20 in Detail, continues the story as he describes the development of these models, the production versions and their capabilities, options and extras, conversions, implements and their use today. Outstanding surviving examples are featured in some 80 photographs specially taken for this book, and there are approximately 120 accompanying archive illustrations.

AVIATION SAFETY: A BALANCED INDUSTRY APPROACH, focuses on various aspects of safety pertinent to the aviation industry. Featuring issues on contemporary aviation safety, flight safety programs, regulatory organizations, ground operations safety, gap analysis, ethics, and safety management systems, the book provides a theoretical
