The Female Brain is a book written by the American neuropsychiatrist Louann Brizendine in 2006. The main thesis of the book is that women's

Read Free The Female Brain

behavior is different from that of men due, in large measure, to hormonal differences.

Brizendine says that the human female brain is affected by the following hormones:
estrogen,
progesterone,

testosterone,
oxytocin,
neurotransmitters,
and that there are
differences in the
architecture of the
brain that
regulates such
hormones and
neurotransmitters.
