Rebuilding the walls of Jerusalem was important because it revealed God's blessing, served as a sign to Israel's enemies, and showed God was with His people. The walls provided protection and dignity to a people who had suffered the judgment of God but had later been restored and returned to the Promised Land.

Why was it important to rebuild the walls around Jerusalem ...

Jackson, John: The Necessity for Ruins. This book is a collection of nine essays written by a cultural landscape icon and founder of Landscape magazine. It is a useful and interesting collection of articles focusing on the evolution of components of built/manipulated environments and discusses how to study cultural landscapes. The first essay follows the history of tourism and its relation to landscape study.

Jackson, John: The Necessity for Ruins

That is what I mean when I refer to the necessity for ruins: ruins provide the incentive for restoration, and for a return to origins...The old farmhouse has to decay before we can restore it and lead an alternative life style in the country; the landscape has to be plundered and stripped before we can restore the natural ecosystem; the neighborhood has to be a slum before we can rediscover it and gentrify it.

Although it has been three and a half years since the last post on our blog, I recently came across an interesting take on ruins. The Monumental Impulse (MIT Press, 1999) by George Hersey explores how architecture sometimes mimics natural phenomena.Hersey explores various creatures that build, structures that look like cells or DNA, and of course buildings that are phallic or vaginal.

Essays examine the way we perceive landscape, the effect of gardens and cities of the past on the landscapes of the present, and the way American architecture has broken with tradition

A pioneer in landscape studies takes us on a tour of landscapes past and present to show how our surroundings reflect our culture. "No one who cares deeply about landscape issues can overlook the scores of brilliant insights and challenges to the mind, eye and conscience contained in Discovering the Vernacular Landscape. It is a book to be deeply cherished and to be read and pondered many times."--Wilbur Zelinsky, Landscape "While it is fashionable to speak of man as alienated from his environment, Mr. Jackson shows us all the ties that bind us to it, consciously or unconsciously. He teaches us to speak intelligently--rather than polemically or wistfully--of the sense of place."--Anatole Broyard, New York Times "This book is a vital and seminal text: do beg, borrow or buy it."--Robert Holden, Landscape Design (London) "Incisive and overpoweringly influential. It will probably tell you something about how you live that you've never thought about."--Thomas Hine, The Philadelphia Inquirer "No one can come close to Jackson in his unique combination of historical scholarship and field experience, in his deep knowledge of European high culture as well as of American trailer parks, in his archivist's nose for the unusual fact and his philosopher's mind for the trenchant, surprising question."--Yi-Fu Tuan

J.B. Jackson, a pioneer in the field of landscape studies, here takes us on a tour of American landscapes past and present, showing how our surroundings reflect important changes in our culture. Because we live in urban and industrial environments that are constantly evolving, says Jackson, time and movement are increasingly important to us and place and permanence are less so. We no longer gain a feeling of community from where we live or where we assemble but from common work hours, habits, and customs. Jackson examines the new vernacular landscape of trailers, parking lots, trucks, loading docks, and suburban garages, which all reflect this emphasis on mobility and transience; he redefines roads as scenes of work and leisure and social intercourse--as places, rather than as means of getting to places; he argues that public parks are now primarily for children, older people, and nature lovers, while more mobile or gregarious people seek recreation in shopping malls, in the street, and in sports arenas; he traces the development of dwellings in New Mexico from prehistoric Pueblo villages to mobile homes; and he criticizes the tendency of some environmentalists to venerate nature instead of interacting with it and learning to share it with others in temporary ways. Written with his customary lucidity and elegance, this book reveals Jackson's passion for vernacular culture, his insights into a style of life that blurs the boundaries between work and leisure, between middle and working classes, and between public and private spaces.

The author views landscaping as an expression of a way of life. This collection of essays is written for the general reader and features articles without footnotes. The subject matter ranges from disquisitions on ordinary houses, yards, farms, and farmsteads to notes on ecology and from the impact of automobile use, mobile homes, shopping centers, and rural and urban planning to philosophical arguments about the meaning of human space and arguments for and against preservation.

Julius Evola's masterful overview of the political and social manifestations of our time, the "age of decline" known to the Hindus as the Kali Yuga. • Reveals the occult war that underlies the crises that have become a prevailing feature of modern life. • Includes H. T. Hansen's definitive essay on Evola's political life and theory. Men Among the Ruins is Evola's frontal assault on the predominant materialism of our time and the mirage of progress. For Evola and other proponents of Traditionalism, we are now living in an age of increasing strife and chaos: the Kali Yuga of the Hindus or the Germanic Ragnarok. In such a time, social decadence is so widespread that it appears as a natural component of all political institutions. Evola argues that the crises that dominate the daily lives of our societies are part of a secret occult war to remove the support of spiritual and traditional values in order to turn man into a passive instrument of the powerful. Evola is often regarded as the godfather of contemporary Italian fascism and right-wing radical politics, but attentive examination of the historical record--as provided by H. T. Hansen's definitive introduction--reveals Evola to be a much more complex figure. Though he held extreme right-wing views, he was a fearless critic of the Fascist regime and preferred a caste system based on spirituality and intellect to the biological racism championed by the Nazis. Ultimately, he viewed the forces of history as comprised by two factions: "history's demolition squad" enslaved by blind faith in the future and those individuals whose watchword is Tradition. These latter stand in this world of ruins at a higher level and are capable of letting go of what needs to be abandoned in order that what is truly essential not be compromised.

Utopia -- Internationalism -- Technocracy -- Conservation -- Inscription -- Conflict -- Danger -- Dystopia

People are drawn to places where geology performs its miracles: ice-cold spring waters gushing from the rock, mysterious caves which act as conduits for ancestors and divinities traveling back and forth to the underworld, sacred bodies of water where communities make libations and offer sacrifices. This volume presents a series of archaeological landscapes from the Iranian highlands to the Anatolian Plateau, and from the Mediterranean borderlands to Mesoamerica. Contributors all have a deep interest in the making and the long-term history of unorthodox places of human interaction with the mineral world, specifically the landscapes of rocks and water. Working with rock reliefs, sacred springs and lakes, caves, cairns, ruins and other meaningful places, they draw attention to the need for a rigorous field methodology and theoretical framework for working with such special places. At a time when network models, urban-centered and macro-scale perspectives dominate discussions of ancient landscapes, this unusual volume takes us to remote, unmappable places of cultural practice, social imagination and political appropriation. It offers not only a diverse set of case studies approaching small meaningful places in their special geological grounding, but also suggests new methodologies and interpretive approaches to understand places and the processes of place-making.

How have ruins become so valued in Western culture and so central to our art and literature? Covering a vast chronological and geographical range, from ancient Egyptian inscriptions to twentieth-century memorials, Susan Stewart seeks to answer this question as she traces the appeal of ruins and ruins images, and the lessons that writers and artists have drawn from their haunting forms. Stewart takes us on a sweeping journey through founding legends of broken covenants and original sin, the Christian appropriation of the classical past, myths and rituals of fertility, images of decay in early modern allegory and melancholy, the ruins craze of the eighteenth century, and the creation of "new ruins" for gardens and other structures. Stewart focuses particularly on Renaissance humanism and Romanticism, periods of intense interest in ruins that also offer new frames for their perception. The Ruins Lesson looks in depth at the works of Goethe, Piranesi, Blake, and Wordsworth, each of whom found in ruins a means of reinventing art. Ruins, Stewart concludes, arise at the boundaries of cultures and civilizations. Their very appearance depends upon an act of translation between the past and the present, between those who have vanished and those who emerge. Lively and engaging, The Ruins Lesson ultimately asks what can resist ruination—and finds in the self-transforming, ever-fleeting practices of language and thought a clue to what might truly endure.

As a war begins, four princesses of enemy kingdoms who were raised as sisters must decide where their loyalties lie: to their kingdoms, or to each other.
