In this circuit, we will build an inverter with a transistor. An inverter is a component or device that inverts the state or logic level of a signal to the opposite logic level. Thus, if a LOW signal

Read Book Transistor Inverter User Guide

is fed into an inverter, it flips it to a HIGH signal. If a HIGH signal is fed into an inverter, it flips it to a LOW signal. So an inverter changes the logic state to the opposite logic of what is fed into it.
